

Finance — Fixes 1 to 9

Before & after for the first finance batch, with worked examples. Prepared so we align before building. Every change is designed to work in **both** billing modes.

1 Aug 2026 · for partner review

Post-pay (Arrears)

Residents pay what they actually owe.
Balance = payments – charges (+ starting balance, – adjustments).

Prepay (Dues)

Residents pay a fixed amount each period; the system reconciles it against the real balance.

Owner vs Tenant

Every unit has an owner; a leased unit also has a tenant. Several fixes below track money separately for each.

1

“Outstanding” should follow the top time filter

BUG

NOW — THE PROBLEM

On the Finance page the top tabs (Month / Year / All time) update **Collected** and **Billed**, but **Outstanding** ignores them. It only reacts to the separate date filter down in the Book section — so it looks out of sync with the figures right next to it.

AFTER — THE FIX

Outstanding responds to the same top filter as its neighbours, showing the outstanding position **as of the end of the selected period**. Change the period once and all four numbers move together.

EXAMPLE — FILTER SET TO “THIS YEAR”

FIGURE	NOW	AFTER
Collected (year)	\$14,400	\$14,400
Billed (year)	\$18,000	\$18,000
Outstanding	\$9,200 (all-time — ignores filter)	\$3,600 (as of 31 Dec)

2 Home-page balance must include starting balances

BUG

NOW — THE PROBLEM

When a building joins, some units already owe money (or are in credit) from before. We enter that as the unit's **starting balance**. The home-page (dashboard) headline ignores it — it only counts charges and payments made inside the app.

AFTER — THE FIX

The dashboard balance includes every unit's starting balance — both those who begin **owing** and those who begin **in credit** — so the headline matches the real books from day one.

EXAMPLE — BUILDING ONBOARDED WITH HISTORY

UNIT	STARTING BALANCE	COUNTED NOW?
A101	owes \$300	No → shows \$0
A102	\$100 credit	No → shows \$0
Dashboard outstanding	should reflect \$300 owed	After: included

3 Voided payment keeps re-appearing

BUG

NOW — THE PROBLEM

Voiding a payment is inconsistent: it leaves the on-screen list but still shows in the **downloaded report**; and when a new payment is later added, the voided one **re-appears** in the list — while the report still carries it.

AFTER — THE FIX

A voided payment is treated the same everywhere — excluded from the list, from all totals, and from the downloaded report — and it **stays** excluded. (It's still kept in the database for audit, just never counted.)

EXAMPLE — VOID PAYMENT OF \$200, THEN ADD A NEW \$150 PAYMENT

WHERE	NOW	AFTER
Payments list	gone, then returns	gone & stays gone
Downloaded report	still shows the \$200	excluded
Totals / balance	unreliable	correct

4 One owner and one tenant per unit

RULE

NOW — THE PROBLEM

A unit that already has an owner can be given a **second owner**; the same for tenants. This corrupts who is responsible for the money.

AFTER — THE FIX

A unit may have **at most one owner and one tenant**. Adding a second is blocked with a clear message — you must remove the existing one first. (This is the foundation the owner/tenant money split, fixes 5–9, relies on.)

EXAMPLE

ACTION	NOW	AFTER
A101 has owner Sara → add owner Karim	allowed (2 owners)	blocked: "A101 already has an owner"
A101 has tenant Ali → add tenant Rima	allowed (2 tenants)	blocked: remove Ali first

5 Direct an expense to the owner or the tenant (includes fix 7)

FEATURE

NOW — THE PROBLEM

When recording an expense you can only allocate it to units in general (an "All members" option). There's no way to say "this one is the tenant's responsibility."

AFTER — THE FIX

The expense form gains one choice: "**For units with tenants, apply to: Owner / Tenant.**" Units that have **only an owner** always go to the owner automatically (no prompt). The old "**All members**" option is removed (fix 7).

EXAMPLE — \$600 WATER BILL, SPLIT BY SHARES ACROSS 3 UNITS, "APPLY TO TENANT"

UNIT	OCCUPANCY	CHARGE LANDS ON
A101	owner + tenant	Tenant
A102	owner only	Owner (automatic)
A103	owner + tenant	Tenant

Both modes: in **post-pay** the charge is recorded on the chosen party's ledger; in **prepay** the same choice decides whose dues that cost feeds into.

6 Owner can switch the view: owner-only / tenant-only / combined

FEATURE

NOW — THE PROBLEM

For a leased unit there's no way for the owner to see their own numbers apart from the tenant's — everything is lumped together.

AFTER — THE FIX

In **Finance and the Dashboard**, an owner of a leased unit gets a toggle: **Owner only** · **Tenant only** · **Combined**. The tenant, of course, only ever sees the tenant's own numbers.

EXAMPLE — OWNER OF A101 OPENS FINANCE

VIEW	SHOWS
Combined (default)	owner + tenant together
Owner only	only what the owner owes/paid
Tenant only	only the tenant's charges/payments

8 Record a payment as owner's or tenant's

FEATURE

NOW — THE PROBLEM

A payment is recorded against the unit with no way to say whether the **owner or the tenant** paid — so a leased unit's two balances can't be kept straight.

AFTER — THE FIX

Only when a unit has a tenant, the payment form shows **"Paid by: Owner / Tenant."** The payment reduces that party's balance only. (This is also what lets fix 11 send the receipt to the right person.)

EXAMPLE — \$200 RECEIVED FOR A101, "PAID BY: TENANT"

LEDGER	EFFECT
Tenant balance	+\$200
Owner balance	unchanged
Receipt / notification	tenant only

Both modes: post-pay reduces the chosen party's outstanding; prepay records it against that party's dues for the period.

9 Balances, reports & dues: total row + owner / tenant sub-rows

FEATURE

NOW — THE PROBLEM

A leased unit shows a single blended balance — you can't see how much is the owner's vs the tenant's.

AFTER — THE FIX

Everywhere a unit balance appears — the Book, downloaded reports, and Dues — a leased unit shows a **total row** with two **sub-rows: Owner and Tenant**. Units with no tenant show a single row (tenant = **N/A**).

EXAMPLE — FINANCE BOOK

UNIT	BALANCE
A101 (leased) — total	\$450 owed
↳ Owner	\$150 owed
↳ Tenant	\$300 owed
A102 (owner only)	\$150 owed · tenant N/A

Both modes: post-pay sub-rows show each party's outstanding; prepay sub-rows show each party's **amount due** and **carry-in** (this is also fix 14).

Fixes 10–21 to be added to this document in the next revision. Order within this batch: bugs (1–3) → owner/tenant foundation (4) → owner/tenant money split (5, 6, 8, 9).
